~~~

[Work Experience]

[Rochester Clinic »](#) 2014

Rochester Clinic is a family owned clinic based in Rochester, Minnesota. Duties included application troubleshooting, installation of new systems, and virus removal on a mixture of Windows platforms (Windows Vista - 8.1 Professional, Server 2008). Accomplishments:

- **Tech support:** providing technical support of Windows Professional and Server editions in a production environment.
- **Part-time work:** working on a mixed schedule to enable minimal downtime.
- **Wordpress Migration:** converting an existing DreamWeaver-based site design to WordPress.

[MLTGroup »](#) 2013

MLT Group is a website and advertising design company based in Rochester, Minnesota. Duties included maintaining the in-house CMS and building out new websites for customers.

Accomplishments:

- **Team members:** learning to interact with others in a professional setting.
- **Time management:** arriving at work prompt and completing work by a deadline.
- **Application continuation:** enhancing and keeping in-house CMS systems up and running.

~~~

## [Products]

### [Tourney picks.org »](#) 2011-present

**Tourney picks** is a custom web interface tracking NCAA tournament picks. This software tracks and automatically scores the rounds, greatly simplifying management of the pool for the client. Users can easily see their standings in the pool as compared to the other users and compare their choices to the results. Accomplishments:

- **Client relationships:** learning the nuances of navigating the client/developer relationship.
- **Time management:** delivering a complete product on a fixed deadline.
- **Customer support:** supporting the client's customers across a variety of devices and platforms.
- **Wordpress:** embedded Wordpress with a minimal theme to match rest of site.

## [Vacava's Invitational » 2012](#)

**Vacava** provides a cloud environment for rapid business application development. Placed second in non-developers category with a website targeted towards tracking project milestones.

Accomplishments:

- **Competitions:** preparing an application/code for use in a competition.
- **Business:** viewing in their eyes and the different needs.

~~~

[Projects]

JavaScript Libraries:

Various libraries centered around new HTML5 features in a dynamic (PHP) environment.

• [jCanvas »](#) is a single function used to draw HTML5 Canvas saving space via outsourcing function calls (`jCanvasDraw(canvas, ctx, "commands")` versus `ctx.beginPath()...ctx.endPath(), etc`).

• [jPage »](#) is a dynamic page state library that supports complex GET/POST requests and interaction with external data.

• [jTable »](#) is a feature filled dynamic table library featuring sorting and searching with rich display capability based on jCanvas and events via jQuery.

Cryptographic Suite:

A partial cryptographic suite built in Python/nCurses centering around ciphers and eventually cryptanalysis.

- Python class support
- nCurses development
- String manipulation.

~~~

## [Education]

### Schooling:

- Homeschooled part time
- Century High School

**Grade:** 12th Grade

### AP Tests:

Literature and Composition (4), Macroeconomics (4), Calculus (5), Computer Science (5), Human Geography (5), Language and Composition (5), United States History (5)

### Letters:
